

Procreative Liberty: Revisiting Obiter Dicta and Holdings on Compulsory Sterilization or Pregnancy Termination from 1913 to 2013 (Paperback)

Filesize: 6.57 MB

Reviews

A top quality book along with the typeface employed was interesting to learn. It is one of the most amazing book we have study. I discovered this pdf from my i and dad recommended this book to learn.
(Mr. Sterling Hane)

PROCREATIVE LIBERTY: REVISITING OBITER DICTA AND HOLDINGS ON COMPULSORY STERILIZATION OR PREGNANCY TERMINATION FROM 1913 TO 2013 (PAPERBACK)

Createspace Independent Publishing Platform, United States, 2014. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.This book raises questions about the legacy of eugenics in contemporary state of reproductive health law - linking the past to recent developments in population control. It presents a comprehensive etiological classification of mental illnesses stratified for the genotype (autosomal-dominant, autosomal-recessive, x-linked and y-linked transmissions; triplet repeat disorders, exon and intron mutations), behavioral phenotype, post-traumatic reactions, spatial orientations, histone disorders, and acquired comorbidity. Based on the advanced directives, seminal precedents, statutory codes and constitutional articles on personhood and reproductive choices, it augments a platform for further systematic analysis of holdings on procreative liberty. As such, the nature, corresponding laws, dispositions, certiori, or obiter dicta of the holdings at the Appellate, Supreme or Circuit Courts are randomly identified through WestLaw or LexisNexis(TM) using multiple keywords or Shepard s symbols, and are combined to produce pooled odds ratio according to the Mantel-Haenszel method. A variety of demographic, societal, clinical, and behavioral determinants (age, gender, ethnicity, income, the degree of mental retardation, criminal history, existing property disputes) are modeled as process variables to explain the cause-outcome relationships. Dispositions are used as units of calculations and as linear functions exposed to the claims. Of the total 52 adjudications reviewed, 40 (76.9 %) concern to the mentally incompetent individuals (minors or sui juris adults) and 12 (23.1 %) healthy inmates of the states prisons, employees of hazardous industries, and ethnic minorities. Of the 40 individuals defined as mentally incompetent, 87.5 suffer various degrees of congenital cognitive deficits, and 12.5 have acquired mental illness after the brain damage either in a car accident or intrapartum - during the traumatic birth. The mean age is 20.78 years in females, and 30.25 years in males. A substantial portion...
