Excerpt from Information for the People of Pennsylvania With Regard to the Influence of Vaccination on Smallpox During the recent epidemic of smallpox in Pennsylvania a family of four; a mother and three children. Were taken to the Municipal Hospital in Philadelphia, the mother seriously ill with smallpox. As there was no one to take care of these children. And as they had all been exposed to the disease and were liable to spread the infection, it was absolutely necessary to take them with their mother to the hospital. Two of these children being old enough to attend school had been vaccinated the year before, under the so-called tyrannical law requiring teachers to forbid the admission to school of children who could not present a certificate of successful vaccination. The third child being younger, the mother, yielding to the persuasion of foolish neighbors, refused to have vaccinated. The result is shown in the illustration taken from a photograph. (fig.
