By A G Heggem

Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Drilling Wells in Oklahoma by the Mud-Laden Fluid Method The waste of natural gas in Oklahoma has been enormous, and unless methods of preventing this waste are adopted the wealth of that State Will be decreased, not only by the intrinsic value of the gas wasted, but by loss of income obtained from those communi ties and industries whose prosperity and life depend on the exist ence and utilization of this ideal fuel. Furthermore, the rapid removal of gas from oil-bearing beds tends to decrease the total yield of oil. The saving of the gas is important to the oil producer also, for the use of gas to generate power makes it possible to operate profitably an oil lease that otherwise may have to be aban doned, and this, too, at a We when the revenue, though small, is steady. At many wells in the older oil fields the natural gas has been wasted, and crude oil, or more generally gasoline, has been used to generate the power to pump the oil, thus increasing the cost of production. The maximum yield...
