Guide for Information Security Program Assessments and System Reporting Form 2. System Assessment The System Reporting Form is a tool for documenting an assessment of the security controls in place for a major application or a general support system. Before a system is assessed, there are key security-related activities that should be completed. An inventory of all systems should be conducted, and then all systems should be categorized according to their impact on the agency's mission. A determination must then be made as to the boundaries of the system, keeping in mind the impact of the information stored within, processed by, or transmitted by the system ( s ). A completed general support system or major application security plan, which is required under OMB Circular A-130, Appendix III, should describe the boundaries of the system, the impact level of the data, and the security controls in place or planned for the system. 2. 1 Systems Inventory and FIPS 199 Categorization FISMA requires that agencies have in place a system inventory. All systems in the inventory should be categorized using FIPS 199, as a first step in support of the security planning activity and eventually in the assessment of the security controls implemented on the system. FIPS 199 is the standard to be used by all federal agencies to categorize all information and information systems collected or maintained by, or on behalf of, each agency...
