John Wiley & Sons, 1988. Softcover. Book Condition: New. Fourth Edition. This specific softcover book is in new condition and has a cover free from major blemishes and scuffing with sharp corners and edges. The pages are clean, crisp, unmarked and uncreased. Due to the size and weight of this book, it is not eligible for priority or international shipping. We package all books in custom cardboard book boxes for shipment and ship daily with tracking numbers.; This class-tested text reflects the refinements made in previous editions while expanding, updating, and adding new information on many important topics. Adopting a bio-organic emphasis, it introduces functional groups early in the text, providing an overview of and preparation for subsequent discussions. This edition includes increased coverage of Carbon 13 spectra; an expanded treatment of conformational effects of molecules, with two sections covering basic geometries of molecules and an in-depth overview of the subject; plus new material on transition metal chemistry and carbohydrate metabolism. Worked-out examples have been added to chapters on synthesis, and end-of-chapter problems have been expanded by more than 200. The text also includes exceptional full-color graphics illustrating conformational effects and general stereochemical properties of organic substances.; 9.90 X 8.20 X 1.50 inches; 669 pages.
