Pearson Education (US), United States, 2011. Hardback. Condition: New. Language: English . Brand New Book. The Classroom Management simulations are multimedia, interactive case studies that give students an opportunity to make complex decisions about how best to handle classroom situations that they will need to master in order to be effective educators. Each Simulation presents a series of four scenarios that require the user to choose from a set of possible decisions. Users receive detailed feedback on their choices. After they've made their initial choice, users can explore other available choices. If the choice they've made is not optimal, the program encourages users to look at other options. However, users' initial choices are recorded by the program and sent to the instructor's grade book. In this way, the Simulations can serve both as a learning tool and as an assessment. The ten Simulations address key areas, including creating expectations, developing positive relationships, responding to disruptive behavior, and bullying. Subscription length is six months.
