Forgotten Books, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from The Influence of Breed and Individuality on the Composition and Properties of Milk In 1906 the Dairy Division of the Bureau of Animal Industry, in cooperation with the Missouri Agricultural Experiment Station, began a series of investigations, the main object of which was to study in detail the factors in uencing the composition and proper ties oi normal milk. It is a well-known fact that although the same constituents are always present in milk, the relative amount of each is subject to constant variations. Among the causes of these variations are known to be the breed of the animal, the stage of lactation, the individuality, and to some-extent the feed, the interval between the milkings, and the temperature and weather conditions. It is also known that the first and the last milk drawn differ in composition. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
