It is one of the best publications. It is definitely simplistic but exciting in the 50% in the ebook. I am very happy to let you know that this is basically the greatest publication I have ever gone through within my own existence and could be the greatest PDF for ever.

This "Report to the Club of Rome" offers a solution. It lies in using resources more efficiently, in ways which can already be achieved, not at a cost but at a profit. The book contains a wealth of examples of revolutionizing productivity, in the use of energy, from hypercars to low-energy beef; materials, from sub-surface drip irrigation to electronic books; and transport, from video conferencing to CyberTran, demonstrating how much more could be generated from much less, today. It explains how markets can be organized and taxes re-based to eliminate perverse incentives and reward efficiency, so wealth can grow while consumption does not. The benefits are enormous: profits will increase, pollution and waste will decrease and the quality of life will improve. Moreover, the benefits will be shared: progress will no longer depend on making ever fewer people more productive. Instead, more people and fewer resources can be employed. While for many developing countries the efficiency revolution may offer the only realistic chance of prosperity within a reasonable time span. The practical promise held out in this book is huge, but the authors show how...
