

Screening of selected plant species of Pakistan for their pharmacological activities

Filesize: 4.8 MB

Reviews

It becomes an remarkable publication that I have possibly go through. Better then never, though i am quite late in start reading this one. I am just delighted to inform you that this is basically the best ebook we have study inside my individual existence and can be he greatest book for actually.

(Dr. Torrey Osinski DVM)

SCREENING OF SELECTED PLANT SPECIES OF PAKISTAN FOR THEIR PHARMACOLOGICAL ACTIVITIES

GRIN Verlag Jul 2011, 2011. Taschenbuch. Book Condition: Neu. 210x148x11 mm. This item is printed on demand - Print on Demand Neuware - Doctoral Thesis / Dissertation from the year 2010 in the subject Chemistry - Bio-chemistry, , language: English, abstract: In this study four plants (*Chrozophora hierosolymitana* Spreng, *Chrysanthemum leucanthemum* L., *Ephedra gerardiana* Wall. ex Stapf and *Quercus dilatata* L.) collected from different regions of Pakistan were screened to identify any chemotherapeutic agents present in them. Seven crude extracts of these plants (leaf, stem and root extracts of *C. hierosolymitana*, aerial parts of *C. leucanthemum*, stem and root extracts of *E. gerardiana* and aerial parts of *Q. dilatata*) were examined for antimicrobial activity using agar diffusion method and agar tube dilution method, cytotoxicity using brine shrimp assay, antitumor activity using potato disc assay, phytotoxic activity using radish seed bioassay and antioxidant activity by using DPPH radical scavenging assay and free radical induced oxidative DNA damage assay. Two plant extracts of *C. hierosolymitana* and *Q. dilatata* showed antibacterial activity. Two plant extracts of *E. gerardiana* and *C. leucanthemum* showed antifungal activity. Two plant extracts i.e., leaf extract of *C. hierosolymitana* and root extract of *E. gerardiana* showed significant brine shrimp cytotoxicity activity (IC₅₀ 171.55 to 523.8 ppm). Six of the seven extracts exhibited tumor inhibition at all the three concentrations tested ranging from 10 to 80%. All extracts showed significant plant growth and seed germination inhibition at higher concentrations against radish seeds. Two extracts of *C. hierosolymitana* and *Q. dilatata* showed growth stimulating effects at lower concentrations. Two extracts of *C. hierosolymitana* and *Q. dilatata* showed significant DPPH radical scavenging activity (IC₅₀ 10.52 to 45.9 ppm). Three of the seven extracts i.e., (R) *E. gerardiana*, (A) *Q. dilatata* and (A) *C. leucanthemum* showed DNA protection activity at 100 and 10 ppm while...
