

Descriptive Statistics and Exploratory Analysis of Data with MATLAB (Paperback)

By Karter J

Createspace Independent Publishing Platform, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. The aim of this book is to introduce the reader to the techniques of descriptive statistics and exploratory data analysis. Statistics Toolbox provides algorithms and tools for organizing, analyzing, and modeling data. You can use regression or classification for predictive modeling, generate random numbers for Monte Carlo simulations, use statistical plots for exploratory data analysis, and perform hypothesis tests. For analyzing multidimensional data, Statistics Toolbox includes algorithms that let you identify key variables that impact your model with sequential feature selection, transform your data with principal component analysis, apply regularization and shrinkage, or use partial least-squares regression. Statistics Toolbox includes specialized data types for organizing and accessing heterogeneous data. Dataset arrays store numeric data, text, and metadata in a single data container. Built-in methods enable you to merge datasets using a common key (join), calculate summary statistics on grouped data, and convert between tall and wide data representations. Categorical arrays provide a memory-efficient data container for storing information drawn from a finite, discrete set of categories.

Reviews

It is one of the best publications. It is definitely simplistic but exciting in the 50 % of the ebook. I am very happy to let you know that this is basically the greatest publication I have gone through within my own existence and could be the greatest pdf for ever.

-- **Dr. Anya McKenzie**

A superior quality publication and the font utilized was intriguing to read. I could comprehend every little thing using this composed e publication. You will like the way the author composed this publication.

-- **Mr. Demario Trantow**
