University of Minnesota Press, United States, 2015. Paperback. Condition: New. Language: English . Brand New Book. Going beyond current scholarship on the media city and the smart city, Shannon Mattern argues that our global cities have been mediated and intelligent for millennia. Deep Mapping the Media City advocates for urban media archaeology, a multisensory approach to investigating the material history of networked cities. Mattern explores the material assemblages and infrastructures that have shaped the media city by taking archaeology literally--using techniques like excavation and mapping to discover the modern city's roots in time. Forerunners: Ideas First is a thought-in-process series of breakthrough digital publications. Written between fresh ideas and finished books, Forerunners draws on scholarly work initiated in notable blogs, social media, conference plenaries, journal articles, and the synergy of academic exchange. This is gray literature publishing: where intense thinking, change, and speculation take place in scholarship.
