When you work in the area of Operational Excellence, Business Excellence, Continuous Improvement, Lean or any of the other labels we give to making businesses better you are continually asked about problem solving. Even amongst fellow professionals there is a huge variation in the capability to solve problems. Throughout my career I have been trained in so many different problem solving methods from Six Sigma and Kepner-Tregoe to A3 Thinking and the 7 Quality Tools that it becomes a bit confusing to explain to others how it all fits together. So I wrote this guide originally to help my fellow Business Excellence professional make sense of the plethora of methodologies, tools and training courses on offer throughout a large multi-national organization. If you can be both methodical and flexible at the same time then you are on the way to becoming an expert problem solver. I hope that in some small way this book helps you to steer your way through the often complex world of problem solving...
