Reviews

The best publication i actually study. I actually have study and so i am confident that i am going to likely to study once more yet again later on. You will not sense monotony at at any moment of your respective time (that's what catalogs are for relating to if you ask me).
(Ernest Bergnaum)

SDN: DEFINING A STRATEGIC, BUSINESS-FOCUSSED ARCHITECTURE

On Demand Publishing, LLC-Create Space, 2015. Paperback. Book Condition: New. 254 x 178 mm. Language: English . Brand New Book ***** Print on Demand *****.For some years now, the network operator industry has been going through an evolutionary period of major technology developments with the creation of Cloud technologies, Software-defined Networking (SDN), Network Functions Visualisation (NFV), Big Data and Next Generation Operations Support Systems (Next Generation OSS). These key innovative technologies target at reducing complexity and controlling service delivery for the network operator, and aim to bringing greater flexibility, agility and simplicity into the network operator environments. The primary focus of these technology developments is to solve the business problems that are constraining the network operators, and to open up new revenue opportunities. Although they are not as silo-based as historic solutions, they still have the need to be architecturally integrated to create a flow through automated business-focused architecture. As network operators achieve revenue by enabling their services over a network infrastructure, the activation, control and management of the service and infrastructure is primary to the business model they operate. SDN sits between the higher-level applications/technologies and the network elements. SDN takes the generalised business logic and abstracts it into the network elements with the purpose of initialising the service on the network infrastructure. In addition, it enables the APIs from the network elements to communicate greater analytics, therefore ensuring that the higher-level applications can drive enhanced service management and control for the benefit of the customer. This is done with the aim of creating greater efficiencies in the operating model of the network operator. With SDN being the enabler technology between the network infrastructure and the higher-level service and business logic applications, SDN can therefore be identified as being the technology which unifies these other innovative technologies for the...
