Safe Is Not an Option

By Rand E. Simberg

Interglobal Media LLC. Paperback. Book Condition: New. Paperback. 242 pages. Dimensions: 8.9in. x 6.0in. x 0.6in. The history of exploration and establishment of new lands, science and technologies has always entailed risk to the health and lives of the explorers. Yet, when it comes to exploring and developing the high frontier of space, the harshest frontier ever, the highest value is apparently not the accomplishment of those goals, but of minimizing, if not eliminating, the possibility of injury or death of the humans carrying them out. For decades since the end of Apollo, human spaceflight has been very expensive and relatively rare (about 500 people total, with a death rate of about 4), largely because of this risk aversion on the part of the federal government and culture. From the Space Shuttle, to the International Space Station, the new commercial crew program to deliver astronauts to it, and the regulatory approach for commercial spaceflight providers, our attitude toward safety has been fundamentally irrational, expensive and even dangerous, while generating minimal accomplishment for maximal cost. This book entertainingly explains why this means that we must regulate passenger safety in the new commercial spaceflight industry with a lighter hand than many might instinctively...
