

Big Data Analytics with MATLAB: Parametric Regression Analysis (Paperback)

Filesize: 3.24 MB

Reviews

The most effective book i at any time read through. It is definitely simplistic but surprises in the fifty percent from the ebook. Your daily life span will probably be enhance once you full reading this ebook.
(Jules Dietrich V)

BIG DATA ANALYTICS WITH MATLAB: PARAMETRIC REGRESSION ANALYSIS (PAPERBACK)

To download **Big Data Analytics with MATLAB: Parametric Regression Analysis (Paperback)** PDF, remember to click the hyperlink beneath and save the ebook or have accessibility to other information which might be highly relevant to BIG DATA ANALYTICS WITH MATLAB: PARAMETRIC REGRESSION ANALYSIS (PAPERBACK) book.

Createspace Independent Publishing Platform, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. MATLAB has the tools to work with large datasets and apply the necessary data analysis techniques. This book develops the work with parametric regression analysis techniques. Big data analytics examines large amounts of data to uncover hidden patterns, correlations and other insights. With today's technology, it's possible to analyze your data and get answers from it almost immediately - an effort that's slower and less efficient with more traditional business intelligence solutions. Regression models describe the relationship between a response (output) variable, and one or more predictor (input) variables. Statistics and Machine Learning Toolbox allows you to fit linear, generalized linear, and nonlinear regression models, including stepwise models and mixed-effects models. Once you fit a model, you can use it to predict or simulate responses, assess the model fit using hypothesis tests, or use plots to visualize diagnostics, residuals, and interaction effects. Statistics and Machine Learning Toolbox also provides nonparametric regression methods to accommodate more complex regression curves without specifying the relationship between the response and the predictors with a predetermined regression function. You can predict responses for new data using the trained model. Gaussian process regression models also enable you to compute prediction intervals.
