Forgotten Books, United States, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Nomenclature of Colors for Naturalists, And, Compendium of Useful Knowledge for Ornithologists In regard to the external anatomy or topography of a bird, a system as little complicated as possible is desirable. The one presented in this work, while substantially the same as that usually adopted, and offering no innovations, is considerably simplified, thereby greatly facilitating the acquirement by the student of a knowledge of this essential adjunct of descriptive ornithology. It is believed also that the figures representing the typical forms of color-markings, and of egg - contours, and the concordant scale of different standards of measurement, will also be found of great practical utility. The author has in every case endeavored to give the plainest possible definition of a term consistent with accuracy. All expressions having reference solely to internal characters, and which therefore seldom if ever enter into ordinary descriptions of birds, have been excluded, though many anatomical and osteological terms occasionally employed in diagnoses of the higher groups, and others pertaining to the general treatment of the subject, are considered and carefully defined. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
