Penguin Books Ltd, United Kingdom, 2002. Paperback. Book Condition: New. 196 x 124 mm. Language: English . Brand New Book. Steven Johnson s Emergence: The Connected Lives of Ants, Brains, Cities and Software is a fascinating look at how self-organising systems are changing the world. Why do people cluster together in neighborhoods? How do internet communities spring up from nowhere? Why is a brain conscious even though no single neuron is? What causes a media frenzy? The answer, as Steven Johnson s groundbreaking book shows, is emergence: change that occurs from the bottom up. When enough individual elements interact and organize themselves, the result is collective intelligence - even though no-one is in charge. It is a phenomenon that exists at every level of experience, and will revolutionize the way we see the world. Exhilarating . (J.G. Ballard). A dizzying, dazzling romp through fields as disparate as urban planning, computer-game design, neurology and control theory . (Economist). Mind-expanding .intelligent, witty and tremendously thought-provoking.Popular science books interesting enough to read twice don t come along all that often . (Guardian). Not just a fascinating quirk of science: it s the future . (The New York Times). Steven Johnson is the author of the acclaimed books Everything Bad is Good for You , Mind Wide Open , Where Good Ideas Come From , Emergence and Interface Culture . His writing appeared in the Guardian , the New Yorker , Nation and Harper s , as well as the op-ed pages of The New York Times and the Wall Street Journal . He is a Distinguished Writer In Residence at NYU s School Of Journalism, and a Contributing Editor to Wired .
