

Global Warming Trends: Ecological Footprints (Global Warming (Facts on File))

By Julie Kerr Casper

Sonlight Christian -M, 2009. Gebundene Ausgabe. Condition: Neu. Neu new item; well packed; Neuware; Rechnung mit MwSt.; Bestellungen bis 15 Uhr werden am gleichen Werktag verschickt. Climate scientists have repeatedly told us that the 1990s had the warmest temperatures ever recorded since records were consistently kept in the mid-1800s. Scientists worldwide support this notion, and there is an abundance of data collected to prove its validity. Some argue that the trend has not been a steady upward climb and that it has had intermittent cooling periods. Although these intervals have occurred every few decades in some locations, the overall tendency has been a steady upward climb, coinciding with melting glaciers, rising sea levels, shifting climatic zones, and changing ecosystems worldwide.; - Climate scientists have repeatedly told us that the 1990s had the warmest temperatures ever recorded since records were consistently kept in the mid-1800s.
