Teaching your child to be a native reader is a joyful, creative and social experience. The techniques of native reading structure just a small portion of your child's natural play, but with this structure, they do something wonderful: the fundamental similarity of written and spoken language becomes apparent, even obvious, to a child. Reading is transformed into a spontaneous skill that children acquire effortlessly, as toddlers, in the course of their play. The benefits go far beyond simply reading early. When a child learns to read natively, deep neural connections are made between oral language and the written word. Reading is transformed into a less abstract and more natural skill. It becomes natively known, just as the ability to talk is known natively. A native reader has a mother tongue not only in the spoken language, but also, deeply, in the written language.
