Mobile ad-hoc networks are of increasing interest for a distributed set of applications, such as distributed collaborative computing, distributed sensing networks, fourth generation wireless systems, and response to incidents that destroyed the existing communication structure. There is current and future need for dynamic ad-hoc networking technology. Mobile ad-hoc networks allow the construction of flexible and adaptive networks with no fixed infrastructure. These networks are expected to play an important role in the future wireless generation. Short live networking presents an insight of mobile ad-hoc networking and associated technologies.
