paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 335 Publisher: China Electric Power Press Pub. Date :2011-3-1. This book has just stepped into the design institute for young architects. not only defined the basic skills necessary for young engineers and basic concepts. but also provides structural designers need to design some of the data memory and internal rules. as well as the methods and data memory tips. By analogy and example. provides a variety of concrete elements (beams. plates. columns. types of foundation) of the simplified hand calculation method. but I also added a rapid increase in Liu Zheng as part of standard conceptual design of the extension and deepening and refinement. Given the current due to market reasons. the increasing structural reinforcement and reconstruction projects. specious error reinforcement approach spread. so I intended to increase the proportion of a chapter. describes efforts such as concrete beams and columns to expand cross-section method is the most reliable. most withstand practice tests and repeated scrutiny of the design methods. and add an additional layer of floor beams in a typical engineering reliable way - bearing side of the slot key connection method and around the cuff and the correct way to correct the current proliferation of long- frequently anchorage reinforcement such wrong practices. This book has just stepped into the structural design for the structural design of this line and read some of the students. Contents: Preface Introduction 1 Chapter 1 Structural designers must have basic skills and concepts necessary to grasp the basic structure of 1.1 younger designers must have basic skills and concepts necessary to master the basic survey reports 1.1 1.1.1 focus on reading .2 how professional development with the construction program 1.1.3...
