CONSTRUCTION OF AN AGRICULTURAL DROUGHT MONITORING SYSTEM USING REMOTE SENSING TECHNIQUES

Alireza Shahabfar
Construction of an
Agricultural Drought
Monitoring System Using
Remote Sensing Techniques
Finding, Evaluating and Refining New Approaches

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Finding, Evaluating and Refining New Approaches | According to the statistics reported by The International Disaster Database, drought is the major natural disaster that has affected several countries from 1900 to early 2011. Therefore accurate and applicable drought monitoring methods are of importance for short and long term regional drought forecasting and disaster management in these countries, especially for agricultural and food production. This study aims at finding, evaluating and refining an...
