

Space-filling curve

By Lambert M. Surhone

Betascript Publishers Jan 2010, 2010. Taschenbuch. Condition: Neu. Neuware - High Quality Content by WIKIPEDIA articles! In mathematical analysis, a space-filling curve is a curve whose range contains the entire 2-dimensional unit square (or more generally an N-dimensional hypercube). Because Giuseppe Peano (1858 1932) was the first to discover one, space-filling curves in the 2-dimensional plane are commonly called Peano curves. Intuitively, a 'continuous curve' in 2 or 3 (or higher) dimensions can be thought of as the 'path of a continuously moving point'. To eliminate the inherent vagueness of this notion, brought to light by Peano's discovery, Jordan in 1887 introduced the following rigorous definition, which has since been adopted as the precise description of the notion of a 'continuous curve' 84 pp. Englisch.
