Brand New Book ***** Print on Demand *****.Excerpt from The Country s Need of Greater Railway Facilities and Terminals Our natural material growth will make this their chronic condition in the near future unless quick action is taken. If you increase the size of a bottle without enlarging the neck, more time and work are required to fill and empty it. That is what has happened to the transportation business, In 1907 traffic was blocked on nearly all the principal Eastern railway lines. It took months to convey an ordinary shipment of goods from one domestic market to another. The dead-lock was broken partly by a panic that lessened the volume of business and partly by the efforts of railway managements to add, by increased efficiency, to the moving power of facilities at command. We neither anticipate nor desire perpetual business depression. While the limits of efficiency have not been reached, we know that it cannot be made to cover the demands of our growth in population and production. The records of any large city will prove this. The tonnage of the Pittsburgh District, for example, by railroad alone, grew from 64,125,000 to 152,000,000 in the ten years between 1901 and 1911. It is both practical and patriotic to ask what is to be done. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
