Catch-up Industrialization: The Trajectory and Prospects of East Asian Economies (Paperback)

By Akira Suehiro

Nus Press, Singapore, 2015. Paperback. Condition: New. UK ed.. Language: English . Brand New Book. Catch-Up Industrialization is an innovative examination of how the political ideology of developmentalism has driven East Asian economic growth. The author considers innovative production and management techniques, the patterns of industrial relations, and the way education shapes the workforce, using this information to assess late 20th century East Asian economic development based on economic liberalization and the rapid diffusion of information technology. The term catch-up links developing and developed countries, and defines the socioeconomic mindset common to high-growth societies of Asia. The author's argument differs from neoclassical approaches emphasizing the workings of the market, statist ones emphasizing policy rather than private initiatives, business studies lacking macroeconomic and global perspectives, work by development economists based on agriculture, and World Bank/IMF studies that lack socio-cultural and historical understanding.
