

Evaluation of fungal antagonists against chocolate spot (B. fabae)

By Teshome, Ermias / Finissa, Chemedo

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Biological control | In developing countries, the impact of Plant diseases on agricultural productivity is immense. In most cases the farmers of these countries are using chemical pesticides for the welfare of their produce. Negligibly, other plant disease management strategies are not in use. In some instances, resistant crop varieties, crop production and integration of them are getting exercised. Currently, there is a need of increasing food production to feed the ever increasing world population. To achieve this goal, management of production constraints is of major concern using any available options. In this regard, biological control of plant disease is better alternative as it is cheap, easy for application as it regenerate in the natural environment, its effect on the applicator is minimal or no effect unlike chemical pesticides, environmentally safe and economically sound. Compatible integration of these biocontrol organisms with other control methods will bring better control of the pests. In this context, this piece work is aimed to introduce the naturally available biocontrol agents and their mode of action in the diseases control process. | Format: Paperback | Language/Sprache: english | 92 pp.

Reviews

If you need to adding benefit, a must buy book. It can be writter in straightforward words and phrases and never difficult to understand. I realized this ebook from my dad and i advised this ebook to learn.

-- **Zula Hayes**

The publication is easy in read better to understand. It is writter in basic words and phrases rather than hard to understand. You wont truly feel monotony at anytime of your respective time (that's what catalogues are for about if you question me).
