

## Ethno-Veterinary Medicine Practices in Forest fringe area of WB,India

By Chanda, Sourav / Biswas, Sukanta

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Ethno-Vety medicine (EVM) has been fueled by the world wide ecological crisis in recent era. It is now recognized that, ancient people have managed their livelihood in which they have lived for generations, without damaging surroundings. Livestock, wildlife & human health have been worst affected through the changed nature. Hence in India, alternatives for critical & costly modern tech. used in animal health care are traditional ITK practices or so named EVM. The Book has aimed at advocating strategies for higher adoption of ITKs & their blended tech. in Vety. practices. So, this study envisaged finding EVM practices available in forest fringe areas of WB by studying socio-cultural features of EVM practitioners, collecting, documenting EVM practices existed in vety. with testing of scientific validity of such practices. The Book has formulated some recommendations based on clinical validation trial & subsequent monitoring of validated practices for wider diffusion of EVM. Since the study area was confined to high altitude tribal forest fringe areas of WB, facts of the book, therefore will be, applicable to such areas of similar geo-climatic & socio-culturaal condition exists. | Format: Paperback | Language/Sprache: english | 164 pp.

### Reviews

*Thorough guideline! Its this type of good read. It is really simplistic but shocks from the 50 percent from the publication. It is extremely difficult to leave it before concluding, once you begin to read the book.*

-- Sallie Wiegand

*The book is fantastic and great. It is loaded with knowledge and wisdom You are going to like the way the article writer create this ebook.*

-- Amaya King
