Createspace Independent Publishing Platform, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Want to learn how to build Core 2.0 MVC and Razor Page Web Applications?Prerequisites: C# (Intermediate level; including Generics, Reflection and Object-Oriented Programming (OOP))HTML5/CSS3 (Basic knowledge)This book is primarily aimed at developers who want to learn how to build Core 2.0 MVC and Razor Page applications. You should be an intermediate level C# developer with some experience in HTML5 and CSS3. The C# language won't be explained in any detail.You will learn Core 2.0 by building three applications. The first application will be built using an empty template, the second with the MVC template, and the third with Razor Pages. The goal with the first basic application is to get you familiar with Core 2.0 by adding middleware and services one piece at a time. Then you will create a solution with three projects; the first project will be used to create a shared database with Entity Framework Core 2.0, the second project is a MVC application for the regular user interface, and the third project is an administrator user interface built with Razor Pages. This solution is a video course website, where users can register to gain access to video courses and administrators can add and modify course content and users.If you are already familiar with MVC 5 or Core 1.0/1.1, the content in this book can get you started with Core 2.0 in a fast, no-fluff way.It's important to mention that this book is practical and tactical, where you will learn as you progress through the modules and build real web applications in the process. To spare you countless pages of fluff (filler material), only valuable information, pertinent to the task at hand, is discussed. The benefit is...
