Forgotten Books, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from On the Roots of Matrices In his memoir on Matrices (phil. Trans. 1858) Prof. Cayley enunciated the theorem: The determinant, having for its matrix a given matrix less the same matrix considered as a single quantity involving the matrix unity, is equal to zero. The equation implied in this theorem is known as Cayley s identical equation. Subsequently (in the Mess. Math. Vol. XIII, p. Mr. A. R. Forsyth gave a proof of this identical equation for matrices of the third order, based upon the solution of a system of linear difference equations.* Forsyth s method is applicable to matrices of any order. Considerable simplicity is gained, however, by the employment of non-scalar equations instead of the scalar equations employed by Forsyth. I have employed this modification of Forsyth s method to prove Sylvester s law of latency and Sylvester s theorem. In addition I have by this method investigated the existence of roots of matrices for different indices and in particular the roots of nilpotent matrices. For valuable suggestions in the working of this paper I am indebted to Dr. Henry Taber. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
