MESHFREE METHODS FOR TIME-HARMONIC NUMERICAL ACOUSTICS

Shaker Verlag Jan 2013, 2013. Buch. Condition: Neu. Neuware - In this work, the meshfree radial point interpolation method (RPIM) and the element free Galerkin method (EFGM) are optimized for time-harmonic acoustic simulations. Procedures for the coupling of meshfree methods with the finite element method (FEM) and with infinite elements are described. Furthermore, an iterative meshfree method is examined. In order to assess the reliability and the efficiency of meshfree methods, various numerical investigations are conducted. 139 pp. Englisch.

Reviews

Excellent electronic book and helpful one. Better then never, though i am quite late in start reading this one. You wont truly feel monotony at whenever you want of your time (that's what catalogues are for relating to when you question me).
