

TOMORROW The World of Time, Future and Predictions

By Madhu Madhavan M

Paperback. Condition: New. 196 pages. We win when we are on the verge of giving up the effort. We fall when we are celebrating our success. All events occur unexpectedly in our life. The events in our life are not at all in proportion to our efforts or abilities. We are surprised, confused and anxious. Can we know our future Ever since the human being rose above the level of the animal and entered into a highly complicated social life, he has been fascinated by this possibility. The book is about the curious world of time, future and predictions. It presents both the theoretical and practical aspects of the subject. The concept of the future is based on the concept of Time. The book analyses the time. Most of the time measurements used by the human beings are centred on the movements of the Earth, the Moon and the Sun. The rotation, revolution, tilt etc. cause a lot of issues in the matter. The various aspects of the time will make us confused. The concepts of the day, week, year etc. are the results of many practical decisions by the scholars of the past. Though these are very much familiar...

Reviews

I just began reading this pdf. It is actually written in straightforward words instead of hard to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.
