PERFORMANCE EVALUATION OF PARALLEL PACKET-PROCESSING ARCHITECTURES USING SYSTEMC-BASED MODELING AND REFINEMENT

Shaker Verlag Feb 2007, 2007. Taschenbuch. Condition: Neu. Neuware - Network nodes, such as broadband access components, are facing new design challenges due to recent trends in applications and technologies. Stringent constraints on platform costs, performance, and power dissipation increasingly require novel programmable application-specific multi-processor architectures to be deployed. Early design space exploration is required to build a proper hardware platform. Multiple processing elements and on-chip interconnects need to be integrated. As complexity grows there is a demand to efficiently...
