JESSICA KINGSLEY PUBLISHERS, United Kingdom, 2006. Paperback. Condition: New. Language: English . Brand New Book. . this book has a much greater value in approaching the particularly difficult field of non-accidental head injuries (NAHI) in children than many sophisticated articles in high-ranked medical journals. This book will affect considerably the approach of the reader to suspected NAHI cases. The book is well worth the couple of hours needed to read it. - Forensic Science, Medicine and Pathology The book provides a logical and thorough overview of a complex and often emotive subject from a professional and objective stance without any obvious bias. In summary, this excellent book provides an insight into the controversial area of non-accidental head injury in babies and infants and will be of interest to paediatricians, social workers, the legal profession and a small number of paediatric nurses, some of whom may come into contact with these families. - British Journal of Neuroscience Nursing For readers in a variety of disciplines, Copley (Cardiff Law School, Wales) and Sanders (Medical Sociology, U. of Manchester) explore challenges of responding to head injury in small children that are not due to accident. The research project underlying the study investigated the quantity and quality of evidence recorded when a subdural haemorrhage is detected, and evaluated the use made of such evidence in making decisions that determine the social and legal consequence for the victims and their families. The methodology and raw results of the research are appended. - academic research volume explores non-accidental head injury in babies and young children, covering medical, social, and legal aspects of this phenomenon, as well as the responsibilities of professionals, child protection agencies and the media in this area. Non-accidental head injury is often referred to as being synonymous with shaken baby syndrome (SBS) - a...
