

Fundamentals of Thermal-Fluid Sciences (in SI Units)

By Yunus A. Cengel, John M. Cimbala, Robert H. Turner

McGraw-Hill Education - Europe, United States, 2012. Paperback. Book Condition: New. 254 x 203 mm. Language: English . Brand New Book. The fourth edition in SI units of Fundamentals of Thermal-Fluid Sciences presents a balanced coverage of thermodynamics, fluid mechanics, and heat transfer packaged in a manner suitable for use in introductory thermal sciences courses. By emphasizing the physics and underlying physical phenomena involved, the text gives students practical examples that allow development of an understanding of the theoretical underpinnings of thermal sciences. All the popular features of the previous edition are retained in this edition while new ones are added. This edition features: a new chapter on Power and Refrigeration Cycles; the new Chapter 9 exposes students to the foundations of power generation and refrigeration in a well-ordered and compact manner. An Early Introduction to the First Law of Thermodynamics (Chapter 3): this chapter establishes a general understanding of energy, mechanisms of energy transfer, and the concept of energy balance, thermo-economics, and conversion efficiency. Learning Objectives: each chapter begins with an overview of the material to be covered and chapter-specific learning objectives to introduce the material and to set goals. Developing Physical Intuition: a special effort is made to...
