

Bulletin of the U.S. Department of Agriculture Volume 800-816

By United States Department of Agriculture, United States Dept of Agriculture

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1920 Excerpt: .Mr. Ronald McKee, in his bulletin on horse beans (8) previously mentioned, states: Horse-bean seed retains its vitality for a number of years. Germination tests of seed 4 years old of a number of varieties grown at Chico, Calif., showed little or no deterioration. It can not be emphasized too strongly that any control measures to prevent weevil infestation should be undertaken by the entire community and not by a few growers. If all growers in the horsebean districts would plant either absolutely uninfested beans, seed which had been given a thorough treatment with carbon disulphid, or seed which had been held over until the second year, the resulting crop would be of a very much higher quality as regards freedom from weevil infestation. LATE PLANTING. It has been observed for some time by horse -bean growers and buyers that the crops from seed planted early...

Reviews

It is just one of my personal favorite publications. It is among the most awesome publications I have read. It is extremely difficult to leave it before concluding, once you begin to read the book.

Very good eBook and valuable one. Better than never, though I am quite late in starting to read this one. I am very easily satisfied with a reading through a created publication.
