

Differential Equations (Classic Reprint)

Filesize: 4.03 MB

Reviews

This created ebook is wonderful. I could possibly comprehend everything out of this created e book. Its been designed in an remarkably easy way and is particularly just after i finished reading through this ebook by which basically modified me, affect the way i believe.
(Verner Langworth III)

DIFFERENTIAL EQUATIONS (CLASSIC REPRINT)

To read **Differential Equations (Classic Reprint)** PDF, remember to refer to the button beneath and save the ebook or have accessibility to other information that are related to DIFFERENTIAL EQUATIONS (CLASSIC REPRINT) ebook.

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English Brand New Book ***** Print on Demand *****.Excerpt from Differential Equations The subject of Differential Equations has grown so rapidly in recent years that it is difficult to do justice to all branches of the subject in a single volume. In writing this book I have endeavoured to supply some elementary material suitable for the needs of students who are studying the subject for the first time, and also some more advanced work which may be useful to men who are interested more in physical mathematics than in the developments of differential geometry and the theory of functions. The chapters on partial differential equations have consequently been devoted almost entirely to the discussion of linear equations. The order in which the material has been arranged is slightly different from that which is usually adopted. Instead of beginning with the standard forms of equations which can be solved very easily, I have devoted the second chapter to the method of integrating factors and the third to the method of transformation. A reader who is not already familiar with the subject will find it worth while to postpone the reading of 13-17 and 32-35 until he has mastered the more elementary work. Chapters VII and VIII contain a few results which I think are new. In Chapter VI the treatment of special solutions bears some resemblance to a treatment which has just recently been sketched by Prof. Hill in an abstract of a memoir which will soon be published in the Proceedings of the London Mathematical Society. My work is independent of Prof. Hill's, for the manuscript was sent to the publishers at the beginning of 1915. Example 3, p. 143, was, however, added last September...
