

## Pediatric Critical Care Study Guide

By Steven E. Lucking

Springer-Verlag GmbH Apr 2012, 2012. Taschenbuch. Book Condition: Neu. 282x210x60 mm. Neuware - This is the first comprehensive study guide covering all aspects of pediatric critical care medicine. It fills a void that exists in learning resources currently available to pediatric critical care practitioners. The major textbooks are excellent references, but do not allow concise reading on specific topics and are not intended to act as both text and study guide. There are also several handbooks available, but these are usually written for general pediatric residents and lack the advanced physiology and pathophysiology required for the higher level pediatric critical care practitioner. This study guide will bridge the gap between the current levels of books in press. It will be physiologically based covering major pediatric critical care principles and specific disease entities commonly encountered by the pediatric critical care practitioner. Pathophysiologic aspects unique to the pediatric patient will be emphasized. Chapters will contain margin notes stressing important key points to the reader and study questions based on the chapter focus will conclude each chapter. The outline of each chapter will be dependent on the section of text as outlines below. The condensed format of coverage is unique, involving heavily-illustrated text...
