A COST-BENEFIT ANALYSIS OF THE FACULTY HEALTH SURVEY PROGRAM (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, 2015. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from A Cost-Benefit Analysis of the Faculty Health Survey Program Periodic health examinations have gained wide-spread acceptance in the United Sates in recent years. Beginning as early as 1915 (15), articles in support of such checkups began appearing in medical journals. In 1922, the American Medical Association officially recognized and approved the value of periodic physical checkups. However, a review of over 150 articles and papers on the subject of periodic health examinations written in the last 48 years (14) reveals that much of the support for such examinations is ideological and philosophic - not emperical. A vast majority of the articles are concerned with one or more of the following themes. First, what are - or better still, what should be - the goals and objectives of such programs? Second, what should a typical or complete physical examination consist of? And third, what have been the findings in these exams; i.e., what hitherto undiscovered conditions have been uncovered and how serious are these conditions? Few of the papers discussed the cost of administering such exams and only three out of all the articles examined attempted to quantify the benefits which accrued to the effort. In examining these three points, the second is purely a medical question (e.g., should proctosigmoidoscopy be performed?) and is not appropriate for discussion here. The first and third points, however, are essential to the issue of determining the benefits of such health programs. They will be discussed in the following pages. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
