

Steps to Savings: How to Build Your Own Maple SAP Preheater (Classic Reprint) (Paperback)

By Northeastern Forest Experiment Station

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Steps to Savings: How to Build Your Own Maple Sap Preheater Yet a more efficient evaporator would give maple syrup producers a much-needed boost in the face of fluctuating demand and rising fuel costs. The development that currently offers the most promise for increasing evaporator efficiency is the heat exchanger or preheater. In this energy-saving system, steam from the evaporating sap is used to heat incoming sap, which passes through pipes on its way to the sap pan. A preheater can be added to an existing evaporator for a small initial cost. The quality of the syrup will not be affected, and processing will cost less because less energy will be lost. A preheater increases the hourly evaporation rate and syrup production by about 15 percent. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
