The remarkable development of Physiology during the nineteenth century justifies us in regarding it as one of the most, modern sciences; yet its origin is very ancient, and may be traced back to the first Hatches of philosophic thought. Throughout the classical world, however, with few exceptions, the term Physiology (according to its etymological signification) denotes the philosophic study of Nature in general, i. e. it includes the phenomena, not merely of living nature, but of inanimate nature as well. . During the Middle Ages, again, until the Renaissance, the Science of Life is confounded with Philosophy, with Natural History, with Medicine in general, and in particular with Anatomy.
