

Highway Infrastructure: Fhwas Model for Estimating Highway Needs Has Been Modified for State-Level Planning: Gao-01-299

Filesize: 5.44 MB

Reviews

This is the greatest book we have read through till now. It is probably the most amazing book we have go through. I am just happy to tell you that here is the greatest book we have read through during my individual daily life and may be he best ebook for possibly.
(Eliseo Leffler)

HIGHWAY INFRASTRUCTURE: FHWA MODEL FOR ESTIMATING HIGHWAY NEEDS HAS BEEN MODIFIED FOR STATE-LEVEL PLANNING: GAO-01-299

Bibliogov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 44 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. The Federal Highway Administration (FHWA) developed the state-level version of the Highway Economic Requirements System (HERS-ST) model as an investment-analysis tool for highway planning at the state level. FHWA officials believe that some state departments of transportation will find the analysis that the HERS-ST model produces useful because it demonstrates the potential results of highway investment decisions from an economic point of view. FHWA is conducting a pilot project for its prototype HERS-ST model with states that volunteered to test the model. FHWA distributed to these states HERS-ST software, technical manuals, and sets of state highway data with which to run the model. FHWA then provided an overall orientation and technical training and addressed states questions during a workshop. Officials from a sample of the states planning to participate reported that they are primarily interested in taking advantage of the models use of benefit-cost analysis to assess alternative highway improvements. If the pilot project shows that states view the HERS-ST model as a useful tool, FHWA expects to upgrade the model for future users. In doing so, it would consider both enhancements that have already been planned for the national-level HESR model and changes targeted specifically to HERS-ST. Changes to improve the HESR-ST models usefulness to states include converting the model to a menu-driven system to improve its ease of use or revising the models data input format so that it matches FHWA's current state highway data reporting requirements. This item ships from La Vergne, TN. Paperback.
