Many investigations applying to these problems are to be found in the Cambridge Transactions and other Transactions, the Philosophical Magazine, and the Comptes Rendus of the French Academy. Prop. 27. Light polarized in a plane inclined by the angle  $\alpha$  to the plane of incidence falls on the surface of a refracting medium: to find the position of the plane of polarization of the reflected light 132. The displacement of a particle of ether before incidence may be represented by in the direction making with the plane of incidence an angle  $(90^\circ - \alpha)$ : and this may be resolved into a  $\cos \alpha$ .  $\sin(\alpha - \alpha)$ ;  $j$  perpendicular to the plane of incidence, and...
