### **Reviews**

*It is really an incredible publication that we have possibly study. Of course, it really is engage in, continue to an interesting and amazing literature. You are going to like how the writer compose this publication.*  
**(Bailey Lehner)**

## LA PRISE EN CHARGE DES MALADES DREPANOCYTAIRES AU CAMEROUN (PAPERBACK)

Univ Europeenne, United States, 2012. Paperback. Condition: New. Aufl.. Language: French . Brand New Book. La drepanocytose est une maladie hereditaire du sang causee par la presence d un gene mute de l hemoglobine et caracterisee par une anemie hemolytique des globules rouges en forme de faucille et des crises vaso-occlusives douloureuses. C est un probleme de sante publique dans plusieurs pays d Afrique sub-saharienne. Au Cameroun Toutes les tranches d age sont touchees et les jeunes de 10 a 29 ans representent 89,2 des malades. C est une maladie dont le cout de prise en charge medicale est tres eleve, environ 1 600 000FCFA pour une crise. Cette maladie est aussi a l origine de nombreux divorces et problemes d adaptation et d insertion sociale dans la vie quotidienne des malades et de leurs proches. Il nous a donc paru urgent de tirer la sonnette d alarme a travers ce travail. Afin que les personnes en charge se decident enfin a prendre leur responsabilite face a ce fleau. Ce travail s adresse a tous, car chacun devrait faire son test d electrophorese de l hemoglobine pour connaitre son statut et agir en consequence.
