SIMULATION OF MILLISECOND CATALYTIC PARTIAL OXIDATION OF METHANE

Julie Flynn
Simulation of millisecond
catalytic partial oxidation of
methane

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Hydrogen can be the key solution of all our energy needs in the future and to face climate change while reducing greenhouse gases. Syngas, H₂ and CO, is industrially produced by steam reforming of methane. A potential alternative is the catalytic partial oxidation of methane. The process is fast, exothermic and auto-thermal. A dual sequential bed catalyst is used, which makes use of a combustion catalyst followed by a reforming catalyst in order...
