SIMON SCHUSTER, United States, 2005. Paperback. Condition: New. New ed. Language: English . Brand New Book. The Hidden Messages in Water is an eye-opening theory showing how water is deeply connected to our individual and collective consciousness. Drawing from his own research, scientific researcher, healer, and popular lecturer Dr Masaru Emoto describes the ability of water to absorb, hold and even retransmit human feelings and emotions. Using high-speed photography, he found that crystals formed in frozen water reveal changes when specific, concentrated thoughts are directed toward it. Music, visual images, words written on paper and photographs also have an impact on the crystal structure. Emoto theorizes that since water has the ability to receive a wide range of frequencies, it can also reflect the universe in this manner. He found that water from clear springs and water exposed to loving words shows brilliant, complex, and colorful snowflake patterns, while polluted water and water exposed to negative thoughts forms incomplete, asymmetrical patterns with dull colors. Emoto believes that since people are 70 percent water, and the Earth is 70 percent water, we can heal our planet and ourselves by consciously expressing love and goodwill.
