The loss of a single species may result environmental repercussions. All life on earth is interconnected, if enough living connections are broken, whole ecosystems could fail and the balance of nature could be forever altered. Our own survival could be jeopardized through the depletion of animal and plant life diversity that provide us with food, many of our life-saving medicines, and endless inspiration. When a species is lost the benefits it might have provided are gone to us forever. This book is a compilation of hand-drawings created by environmental artist Bianca Trevino aiming to educate, cultivate creativity, and create awareness about endangered species around the globe. This adult coloring book features 9 endangered species in different scales and complexities. It provides hours and hours of stress relief, mindful calm, and fun creative expression, along with fun fact about the species, and easy ways to help save and conserve the environment where they live. A percentage of your purchase will go to associations who have been working for years on the conservation of environments where these species live. FYI: Environmental consciousness is important to us. Amazon produces units only as they re ordered, which reduces excess production.
