In the Lectures which Dr. Fowler has kindly taken the pains to submit to the appreciation of our American confreres I have selected, as occasion required, information furnished by normal anatomy, experimental physiology, and clinical observation, illustrated by minute and methodical examination of organic lesions. I shall consider it as a great honor if my book should be favorably received in a country where instructors in neural pathology are represented by scientists such as my friend W. Mitchell, and various others whom I might enumerate. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
