ASTROPHYSICS OF NEUTRON STARS

Springer. Paperback. Condition: New. 322 pages. Dimensions: 8.9in. x 5.9in. x 0.7in. Here the reader will find a description of the current state of experimental and theoretical investigations of neutron stars in all their manifestations: radio pulsars, X-ray pulsars, X-ray bursters, transient X-ray sources, and so on. The approach adopted stresses the idea that the astrophysical properties of a neutron star are determined mainly by its interaction with its surroundings, that is, the interaction of the intense intrinsic magnetic field of the neutron star with an accreting plasma. Thus the book also treats topics in plasma physics and magnetohydrodynamics. Students and professionals in astrophysics and physics alike will find this revised and enlarged version of the original Russian edition essential reading for its coverage of neutron star classification and evolution. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
