Freedom Publishing Company (IL), United States, 2011. Paperback. Book Condition: New. 226 x 150 mm. Language: English . Brand New Book. Extraordinary Healing documents the extraordinary story of French researcher Mirko Beljanski, known as the father of environmental medicine. Beljanski's discovery of destabilized DNA and the specific plant molecules that can help restore DNA to a healthy state and stop pathological cells from replicating have led to many miraculous cures and prolonged survival for thousands of cancer patients, including French President Francois Mitterand. Previously well-known only in France (where citizens picketed in the streets to be able to use the same protocols which extended the life of President Mitterand), Beljanski's protocols are now gaining popularity in the U.S. and are being used by scientists at Columbia University. L. Stephen Coles, M.D., Ph.D., an expert on supercentenarians-people who live beyond the age of 110-gives an insightful account of the revolutionary approach to prevention and support pioneered by Beljanski, who spent thirty years at the prestigious Pasteur Institute in Paris. A compelling tale of a courageous and brilliant researcher, Extraordinary Healing illuminates the promise of specific, natural plant molecules in the restoration and protection of cellular health. It is a must-read for anyone in the field of cancer research.
