Absorb everything you need to know in under 20 minutes. What does this FastReads Summary Analysis Include? A short synopsis of the original book Editorial Review of the writing style and content Key takeaways of the author's main points Brief chapter-by-chapter summaries A short bio of the author Original Book Summary Overview Can you imagine that plants may resent us for eating them, and that they might have set up some defenses so that we get sicker and sicker whenever we consume them? Dr. Steven Gundry, an expert on health and nutrition, drops some controversial revelations about how some foods we have been considering healthy, are actually contributing to our illnesses and decline in quality of life. Hard as it is to believe, Dr. Gundry explains that grains and whole wheat are causing obesity and a number of seemingly unrelated conditions, such as arthritis, migraines, and autoimmune responses, as part of their defenses against being eaten by predators like...
